OPERATOR'S NAME (PRINT) | OPERATOR'S SIGNATURE | Number of crew who fished | Number of fish caught by crew

ORIGINAL= DEPARTMENT OF FISH AND WILDLIFE COPY ****** DUPLICATE = OPERATOR'S COPY**

CPFV LOGBOOK
IMPORTANT INSTRUCTIONS

Print neatly in black ink using block-style numbers and **CAPITAL LETTERS ONLY**. Stay **entirely** within the boxes when filling in numbers or check marks.

1. Complete a separate log for **each trip** during a day or for **each day** of a multi-day trip. Logs are required for all fishing trips into Mexican waters originating from CA ports.
2. For months when no fishing activity occurred, a log shall be completed on the last day of the month and the month written in the box indicating no fishing activity.
3. Print the vessel name, vessel number, port of landing, port code, and date clearly.
4. Prior to departure, record the total number of crew members that will fish on the trip, including the skipper (operator), at the bottom right of the log, after the operator's signature.
5. Check the appropriate boxes for Target Species, Fishing Method, Bait, Trip Type, Descending Device and Bird Interactions. Bird interactions consist of birds eating chum, bait on a hook or the hooked fish.
6. Departure and return times should be in military time, i.e. 06:20 hours, 23:15 hours, etc. The date of the trip should be the day you departed the dock.
7. On multi-day trips, enter the appropriate date on each log. Record departure time only on the day of departure and enter 25:99 in the return time box (unless an unscheduled return time is made the same day). On the day of return, record return time only and enter a 25:99 in the departure time box. Between the day of departure and the day of return, enter a 25:99 in both the departure and return time boxes. Enter hours and minutes fished only on those days that fishing occurs.
8. Record the total number of fishers who **will** fish on the trip. This shall include passengers, operators, crew, and non-paying guests who will fish.
9. Record the Origin Block number, Depth in feet, and Sea Surface Temperature in degrees Fahrenheit (°F) where most of the fish are caught or if no catch is made, where most of the fishing takes place.
10. Record the total number of each species of fish taken, thrown back or lost to sea lions on each line item, regardless of who landed or released the fish.
11. Print the names and number of any misc. species kept, thrown back or lost to sea lions.
12. Upon completion of the trip, the total number of fish caught and retained by the operator and crew must be recorded in the second space provided following the operator's signature.
