

Hello:

My name is Bonnie and I am very concerned about this thing on Savannah cats. First off I love animals and mostly cats, I have been a cat owner for years.

My daughter has owned Savannahs for 11 years and they are like her children . They interact with the whole family and are so loving. She has cared for her grandchild since he was born and her cats have all been his protector.

She walks her boy now on a leash and he is so good. Everyone stops and asks her what kind of cat he is and is so sweet with people.

She also has 3 adopted kitties from the animal shelter and they blend in so well with her Savannah . He takes them on as his brothers and they do very well together.

I could go on and on about her Savannah , I have loved the breed since she got her first one. They are smart, loving and loyal and a joy to be around.

Please do not let this bill pass, it would break so many hearts and tear up so many kitty familys. Please look into your own heart as a human being and see these cats do not pose a threat to anyone.
