---

I have just been made aware of the review written by the society on predator hunting pertaining to the use of dogs. I would like to speak up against the obvious lack of understanding of the long relationship hound hunters and hunters in General have with the wildlife community and the sacrifices we have made to help them be successful by supporting them morally and financially with our purchases of tags and community support with our purchases there. I would like to know what they bring to the table that does not mean the loss of that important relation we have. I would think someone would have taken notice after the lack of our participation in this years bear hunt and the poor showing we all suffered and will suffer if it continues. We only want to hunt and continue livening or life style and honor our heritage. Thank for your time and I await your reply.
