Options on Implementing the Non Lead Ban

I was born and raised in Chino, California. I have hunted with my father since I was old enough to walk in his footsteps, literally. I have purchased Hunting License with all necessary stamps in order to hunt in this great state. My concern with the ban on all lead ammunition is the lack of ammunition available to me. I hunt upland game. As you know, ammunition is difficult to acquire. Please address the issue concerning the availability of non lead ammunition for upland game hunting. Please do not contribute to the destruction of hunting in California. Remember, hunters are the original conservationists.
