Dear California fish and game commission:

My name is Natalia Kawczak, I am 10 years old and I do the Oak Meadow curriculum. I have been learning about salamanders and specifically the tiger salamander. I was learning how tiger salamanders are an endangered species and that you guys might take away their ponding. They have been getting smushed by cars because they just want to get to the other side so they can mate. I do not think you should take away tiger salamanders ponding because they are very important to the environment. They are important because they eat insects and if there were no salamanders left then we would have a lot of insects flying around.

Sincerely,

Natalia
