Subject: corruption in squid ind or is it fish and game commission
Date: Sunday, September 07, 2014 12:00:33 PM

The squid scoop fleet is hearing that the wet fish association is going to allow the scoop fleet to harvest 3000 ton of a quota that has been poach do to the DMV laws being broken and calif lic dept breach of contract by allowing a the landing capacity of the fleet has doubled if not trippled and the quota is not only the original 118000 ton but the wet fish assosation and senior biologist conspired to shut us down 10000 ton short just so the scoop fleet could not participate just as the squid started there night spawning ritual to supply the pacific ocean it's squid egg biomass to insure the squid population is sustained. this commission is responsible for the job loss and the demise of calif economic engine. When I unload a load of scooped squid there are three job on the boat 10 jobs on the dock unloading 20 jobs at the packing house and another 20 jobs between shipping and restaurants that's 50 jobs . Those 50 jobs need tires tooth paste and tampons and those 50 jobs and those 50 jobs the ripple affect of the job loss that this commission has caused is not only illegal do to there discremenation against the cleanest harvesting practice in the world. I guess my question is who is running fish and game (It sure seems like the wet fish association has more authority then the commissioners) on the squid landing
