Subject: Legalization of Hedgehogs
Date: Friday, February 27, 2015 8:08:28 PM

To California Fishing and Gaming Commission,
It's time to change the law regarding Hedgehogs. I'm not Talking about the laws regarding Ferrets or Skunks but only the laws about Hedgehogs. Hedgehogs pose no threat to society or the environment. I understand the fear of Hedgehog being pet. They could escape and multiply. From my understanding I believe that's all the fears but don't dogs and cats escape from homes everyday (many other animals as well). I have a solution to prevent the over population of Hedgehogs. The California law that prohibits Hedgehogs to be allowed in C.A. should be lifted but with a new law that you must neuter/spay a Hedgehog in order to keep a Hedgehog as a pet. Unless you have a special permit as a breeder, they're no exceptions. Another law should be you must be a certain age to own one. That could insure responsibility and commitment from the potential owner. Give the Hedgehog a chance! I'd like to thank you for your time and have a great day!

From,
