

STATE OF CALIFORNIA
FISH AND GAME COMMISSION
INITIAL STATEMENT OF REASONS FOR REGULATORY ACTION
(Pre-publication of Notice Statement)

Amend Section 502
Title 14, California Code of Regulations
Re: Waterfowl, Migratory; American Coot; and
Common Moorhen (Common Gallinule)

I. Date of Initial Statement of Reasons: January 20, 2015

II. Dates and Locations of Scheduled Hearings:

- (a) Notice Hearing: Date: April 9, 2015
Location: Santa Rosa, CA
- (b) Discussion Hearing: Date: June 11, 2015
Location: Mammoth Lakes, CA
- (c) Adoption Hearing: Date: August 5, 2015
Location: Fortuna, CA

III. Description of Regulatory Action:

- (a) Statement of Specific Purpose of Regulation Change and Factual Basis for Determining that Regulation Change is Reasonably Necessary:

The U.S. Fish and Wildlife Service (Service) annually establishes federal regulation “frameworks” in late July after they analyze current waterfowl population data and gather input from the public. These “frameworks” describe the earliest waterfowl hunting seasons can open, the maximum number of days hunting can occur, the latest hunting seasons must close, and the maximum daily bag limit, among other things. States must set waterfowl hunting regulations within the federal frameworks.

States may make recommendations to change federal framework regulations. These recommendations are made to Flyway Councils during March and July. The Councils may elect to forward these recommendations to the Service. The Service may elect to incorporate proposed changes in the “framework” regulations. For most waterfowl hunting season regulations, the Service establishes the “framework” regulations in late July at a public meeting; however the publication of

these decisions in the Federal Register does not occur until September. California has made one proposal to change federal frameworks.

Sections 202, 355 and 356 of the Fish and Game Code authorize the Fish and Game Commission to annually adopt regulations pertaining to the hunting of migratory birds that conform with, or further restrict, the regulations prescribed by the Service pursuant to their authority under the Migratory Bird Treaty Act. The Fish and Game Commission selects and establishes in State regulations the specific hunting season dates and daily bag limits within the federal frameworks.

Current regulations in Section 502, Title 14, California Code of Regulations (CCR), provide definitions, hunting zone descriptions, season opening and closing dates, and daily bag and possession limits. Item 1 provides notice that other framework regulations regarding duck season lengths and bag limits may change in 2015 when current biological information becomes available. Item 2 requires Flyway Council and Service approval to establish the season length for brant pursuant to the process described above.

The specific recommended regulation changes are:

- 1) Changes in subsection 502(d) provide a range of waterfowl hunting season lengths (which may be split into two segments) between 38 and 107 days (including 2 days for Youth Waterfowl Hunting Days) for all hunting methods. A range of daily bag limits is also given for ducks in all zones. In addition, an increase in the bag limit for geese in the Colorado River Zone is proposed to match waterfowl regulations in neighboring Arizona. Federal regulations require that California's hunting regulations conform to those of Arizona in the Colorado River Zone and with Oregon in the North Coast Special Management Area. See tables in the Informative Digest for season and bag limit ranges.

The existing waterfowl hunting regulations establish specific season dates and daily bag limits for each zone. This proposal provides ranges for the season dates and daily bag limits. These ranges are necessary as the specific opening and closing dates and daily bag limits cannot be proposed until the California Waterfowl Breeding Population Survey is completed in May and the Service has established federal regulation "frameworks" for the 2015/16 waterfowl hunting season. The Service will establish the frameworks in late July after the analysis of current waterfowl population survey, other data, and input from the Flyway Councils and the public.

- 2) Changes in subsections 502(d)(6)(B)6. and 502(d)(6)(B)7. propose a range for brant season length in the Northern Brant and Balance of State Brant special management areas.

The existing brant season lengths in the above mentioned special management areas are 30 days. This proposal provides a season length range to a maximum of 45 days. The range is necessary as the increase in season length cannot be formally proposed until the Midwinter Waterfowl Survey is analyzed and the Brant Management Plan is finalized at the July Pacific Flyway meeting. In addition, Flyway Council and Service approval is needed for these proposed changes.

Minor editorial changes are also proposed to clarify and simplify the regulations and to comply with existing federal frameworks.

- (b) Authority and Reference Sections from Fish and Game Code for Regulation:

Authority: Sections 202 and 355, Fish and Game Code.

Reference: Sections 202, 355, and 356, Fish and Game Code.

- (c) Specific Technology or Equipment Required by Regulatory Change:

None.

- (d) Identification of Reports or Documents Supporting Regulation Change:

2015 Draft Environmental Document Migratory Game Bird Hunting

- (e) Public Discussions of Proposed Regulations Prior to Notice Publication:

This proposal was discussed at the Fish and Game Commission's Wildlife Resources Committee meeting held on January 14, 2015 in West Sacramento, CA.

IV. Description of Reasonable Alternatives to Regulatory Action:

- (a) Alternatives to Regulation Change:

No other alternatives were identified.

(b) No Change Alternative:

- 1) The No Change Alternative would maintain the existing season lengths and dates, and duck and goose daily bag limits in all zones. The California Breeding Pair Survey has not been completed and analyzed and the federal frameworks have not been set. Changes in the existing regulations could result if specific dates and bag limits are proposed before the above items are completed.
- 2) The No Change Alternative would maintain the existing season length of 30 days for brant in the Northern Brant and Balance of State Brant special management areas.

(c) Consideration of Alternatives: In view of information currently possessed, no reasonable alternative considered would be more effective in carrying out the purpose for which the regulation is proposed, would be as effective and less burdensome to affected private persons than the proposed regulation, or would be more cost effective to affected private persons and equally effective in implementing the statutory policy or other provision of law.

(d) Description of Reasonable Alternatives That Would Lessen Adverse Impact on Small Business: None.

V. Mitigation Measures Required by Regulatory Action:

The proposed regulatory action will have no negative impact on the environment; therefore, no mitigation measures are needed.

VI. Impact of Regulatory Action:

The potential for significant statewide adverse economic impacts that might result from the proposed regulatory action has been assessed, and the following initial determinations relative to the required statutory categories have been made:

(a) Significant Statewide Adverse Economic Impact Directly Affecting Businesses, Including the Ability of California Businesses to Compete with Businesses in Other States:

The proposed action will not have a significant statewide adverse economic impact directly affecting business, including the ability of California businesses to compete with businesses in other states. The proposed regulations are intended to provide additional recreational opportunity to the public. The response is expected to be minor in nature.

- (b) Impact on the Creation or Elimination of Jobs Within the State, the Creation of New Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California; Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State's Environment:

The Commission does not anticipate any impacts on the creation or elimination of jobs, the creation of new business, the elimination of existing businesses or the expansion of businesses in California. The proposed waterfowl regulations will set the 2015-16 waterfowl hunting season dates and bag limits within the federal frameworks. Positive impacts to jobs and/or businesses that provide services to waterfowl hunters will be realized with the proposed regulations for the waterfowl hunting season in 2015-16. This is based on a 2011 US Fish and Wildlife national survey of fishing, hunting, and wildlife associated recreation for California. The report estimated that migratory bird hunters contributed about \$169,115,000 to businesses in California during the 2011 migratory bird hunting season. The impacted businesses are generally small businesses employing few individuals and, like all small businesses, are subject to failure for a variety of causes. Additionally, the long-term intent of the proposed regulations is to sustainably manage waterfowl populations, and consequently, the long-term viability of these same small businesses.

The Commission anticipates benefits to the health and welfare of California residents. Hunting provides opportunities for multi-generational family activities and promotes respect for California's environment by the future stewards of the State's resources. The Commission anticipates benefits to the State's environment by the sustainable management of California's waterfowl resources. The Commission does not anticipate any impacts to worker safety because the proposed amendments will not affect working conditions.

- (c) Cost Impacts on a Representative Private Person or Business:

The Commission is not aware of any cost impacts that a representative private person or business would necessarily incur in reasonable compliance with the proposed action.

- (d) Costs or Savings to State Agencies or Costs/Savings in Federal Funding to the State:

None.

(e) Nondiscretionary Costs/Savings to Local Agencies:

None.

(f) Programs Mandated on Local Agencies or School Districts:

None.

(g) Costs Imposed on Any Local Agency or School District that is Required to be Reimbursed Under Part 7 (commencing with Section 17500) of Division 4, Government Code:

None.

(h) Effect on Housing Costs:

None.

VII. Economic Impact Assessment

The proposed waterfowl regulations will set the 2015-16 waterfowl hunting season dates and bag limits within the federal frameworks.

(a) Effects of the regulation on the creation or elimination of jobs within the state

Positive impacts to jobs and/or businesses that provide services to waterfowl hunters will be realized with the adoption of the proposed waterfowl hunting regulations for the 2015-16 season. This is based on the 2011 U.S. Fish and Wildlife National Survey of Fishing, Hunting, and Wildlife-Associated Recreation for California (issued Feb. 2013). The report estimates that hunters contributed about \$169,115,000 to small businesses in California during the 2011 waterfowl hunting season. The impacted businesses are generally small businesses employing few individuals and, like all small businesses, are subject to failure for a variety of causes. Additionally, the long-term intent of the proposed regulations is to sustainably manage waterfowl populations, and consequently, the long-term viability of these same small businesses. The 2011 report is posted on the US Dept. of Commerce website at <http://www.census.gov/prod/2013pubs/fhw11-ca.pdf>.

(b) Effects of the regulation on the creation of new businesses or the elimination of existing businesses within the state

The result of the regulations on the creation of new businesses or the elimination of existing businesses within the state will be neutral. Minor variations in the bag limits as may be established in the regulations are, by themselves, unlikely to stimulate the creation of new businesses or cause the elimination of existing businesses. The number of hunting trips and the economic contributions from them are expected to remain more or less the same.

- (c) Effects of the regulation on the expansion of businesses currently doing business within the state

The long-term intent of the proposed regulations is to sustainably manage waterfowl populations, and consequently, the long-term viability of small businesses that serve recreational waterfowl hunters. Minor variations in the bag limits as may be established in the regulations are, by themselves, unlikely to stimulate substantial expansion of these existing businesses.

- (d) Benefits of the regulation to the health and welfare of California residents

Hunting is an outdoor activity that can provide several benefits for those who partake in it and for the environment as well. The fees that hunters pay for licenses and stamps are used for conservation. In addition, the efforts of hunters can help to reduce wildlife depredation on private lands. Hunters and their families benefit from fresh game to eat, and from the benefits of outdoor recreation. People who hunt have a special connection with the outdoors and an awareness of the relationships between wildlife, habitat, and humans. With that awareness comes an understanding of the role humans play in being caretakers of the environment. Hunting is a tradition that is often passed on from one generation to the next creating a special bond between family members and friends.

- (e) Benefits of the regulation to worker safety

The regulations will not affect worker safety because they will not impact working conditions.

- (f) Benefits of the regulation to the state's environment

It is the policy of this state to encourage the conservation, maintenance, and utilization of waterfowl resources for the benefit of all the citizens of the state. The objectives of this policy include, but are not limited to, the maintenance of sufficient populations of waterfowl to ensure their continued existence and the maintenance of a sufficient resource to support recreational opportunity. Adoption of scientifically-based waterfowl seasons, bag and possession limits

provides for the maintenance of sufficient populations of waterfowl to ensure those objectives are met.

(g) Concurrence with other Statutory Requirements:

Not applicable

DRAFT

Informative Digest/Policy Statement Overview

Current regulations in Section 502, Title 14, California Code of Regulations (CCR), provide definitions, hunting zone descriptions, season opening and closing dates, and establish daily bag and possession limits for waterfowl. Item 1 provides notice that other framework regulations regarding duck season lengths and bag limits may change in 2015 when current biological information becomes available. Item 2 requires Flyway Council and Service approval to establish the season length for brant, pursuant to the process described below.

The Service will consider recommendations from the Flyway Council at their meeting in late July 2015. At this time, the California Waterfowl Breeding Population Survey has not been conducted and the Service has not established federal regulation “frameworks” which will occur in August after the analysis of current waterfowl population survey, other data, input from the Flyway Councils and the public.

The Department’s proposals are as follows:

1. Provide a range of waterfowl hunting season lengths (which may be split into two segments) between 38 and 107 days (including 2 youth waterfowl hunt days) for all hunting methods. A range of daily bag limits is also given for ducks in all zones. In addition, an increase in the bag limit for geese in the Colorado River Zone is proposed to match waterfowl regulations in neighboring Arizona. Federal regulations require that California’s hunting regulations conform to those of Arizona in the Colorado River Zone and with Oregon in the North Coast Special Management Area. See the table below for season and bag limit ranges.
2. Provide a range of brant season lengths in the Northern Brant and Balance of State Brant special management areas to allow for a possible increase in season length.

Minor editorial changes are also proposed to clarify and simplify the regulations and to comply with existing federal frameworks.

Benefits of the regulations

The benefits of the proposed regulations are concurrence with federal law and the sustainable management of the State’s waterfowl resources. Positive impacts to jobs and/or businesses that provide services to waterfowl hunters will be realized with the continued adoption of waterfowl hunting seasons in 2015-16.

Non-monetary benefits to the public

The Commission does not anticipate non-monetary benefits to the protection of public health and safety, worker safety, the prevention of discrimination, the promotion of fairness or social equity and the increase in openness and transparency in business and government.

Evaluation of incompatibility with existing regulations

The Commission has reviewed its regulations in Title 14, CCR, and conducted a search of other regulations on this topic and has concluded that the proposed amendments to Section 502 are neither inconsistent nor incompatible with existing State regulations. No other State agency has the authority to promulgate waterfowl hunting regulations.
