New award recognizes outstanding efforts to increase awareness and safeguard U.S. natural resources from climate change

Individuals or groups can be nominated until January 8, 2016

November 12, 2015

As part of President Obama's [Climate Action Plan](#) and the [National Fish, Wildlife & Plants Climate Adaptation Strategy](#), an interagency group of federal, state, and tribal agencies today announced creation of a new [Climate Adaptation Leadership Award for Natural Resources](#).

The Award will recognize the actions of individuals and organizations that are making a difference by increasing understanding of climate impacts, adapting to and reducing threats, increasing response capabilities, and providing other innovative approaches to reducing impacts and increasing resilience in a changing climate. It will help spotlight innovative tools and actions that are making a difference now, and serve as a source of inspiration for additional efforts that advance climate smart resource conservation and management.

"Our climate is changing, and these changes are already affecting the nation's valuable wildlife and natural resources," said Michael Bean, Principal Deputy Assistant Secretary of the Interior for Fish and Wildlife and Parks. "This new Award recognizes outstanding leadership by organizations and individuals that is critical to help advance the resilience of our natural resources and the people, communities, and economies that depend on them."

Establishment of the Climate Adaptation Leadership Award for Natural Resources was one of the commitments announced as part of the Administration's [Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources](#) in 2014. The agenda calls for a commitment across the federal government to support resilience of America's vital natural resources.

The Award also directly addresses the goals of the National Fish, Wildlife, and Plants Climate Adaptation Strategy, which was developed by a coalition of federal, state, and tribal natural resource agencies. These include:

- Goal 1: Conserve and connect species, habitats and ecosystems;
- Goal 2: Manage species and habitats to protect ecosystem functions and provide sustainable use;

- Goal 3: Enhance management capacity;
- Goal 4: Support adaptive management;
- Goal 5: Increase knowledge and information on natural resource impacts and responses to climate change;
- Goal 6: Increase awareness and motivate action to safeguard natural resources; and
- Goal 7: Reduce non-climate stressors to natural resources.

"State fish and wildlife agencies serve as stewards of the nation's fish and wildlife resources," said Dave Chanda, President of the Association of Fish and Wildlife Agencies, which is helping to lead implementation of the National Fish, Wildlife, and Plants Climate Adaptation Strategy. "Today's threats to fish, wildlife, and their habitats are exacerbated by climate change and underscore the need for incorporating climate adaptation in to conservation and science-based management." [Nominations will be accepted](#) until January 8, 2016. Individuals, groups, organizations and government agencies are eligible to apply. Three to five Awards are expected to be announced in 2016.

Fish, wildlife, and plant resources provide important benefits and services to Americans every day, including jobs, income, food, clean water and air, building materials, storm protection, tourism and recreation. For example, hunting, fishing and other wildlife-related recreation contribute an estimated \$120 billion to our nation's economy every year, and marine ecosystems sustain a U.S. seafood industry that supports approximately 1.7 million jobs and \$200 billion in economic activity [annually](#).

Award sponsors include the U.S. Department of the Interior, U.S. Fish & Wildlife Service, the Commerce Department's National Oceanic and Atmospheric Administration, the Natural Resources Conservation Service and the U.S. Forest Service. They will sponsor the award in collaboration with the National Fish, Wildlife, and Plants Climate Adaptation Strategy's Joint Implementation Working Group, which is composed of representatives from 21 federal, state and tribal natural resource agencies.

For more information about the Award or how to apply, please visit [the Climate Adaptation Leadership Award main page](#).

NOAA's mission is to understand and predict changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and to conserve and manage our coastal and marine resources. Join us on [Facebook](#), [Twitter](#), [Instagram](#) and our other [social media channels](#).
