Subject: End Bobcat Trapping in California
Date: Wednesday, January 28, 2015 12:03:19 PM

I am writing to urge you to implement the Bobcat Protection Act of 2013 by banning all bobcat trapping throughout the entire state of California. I was appalled to learn that hundreds of the state's native bobcats are trapped and killed each year for the sale of their skins in the international fur trade. These animals are not commodities to be exploited by a handful of trappers, and so we must protect and value them for what they are -- living members of a healthy ecosystem. If the state is to bring its wildlife laws into the 21st century, it must vote for a complete ban on trapping bobcats.

Sincerely,

monica lundy
