

California Fish and Game Commission
Potential Upland Game Hunting Regulation Changes

January 5, 2015

The items identified in this list are in no particular order; staff intent is simply to capture and “park” the various ideas received and under review. This list is intended only to generate dialogue at the Commission’s Wildlife Resources Committee about what the next upland game hunting rulemaking might or might not include.

There are currently two proposals for Title 14, Section 300 changes:

1. Make annual adjustments and recommendations for greater sage-grouse hunting permits by zone.
2. Increase spring shooting hours for turkeys from 4:00 p.m. to 5:00 p.m.
