Section 5.88, Title 14, CCR, is amended to read:

§5.88. Steelhead Report and Restoration Card Requirements for Inland Waters (FG 682, See Section 701).

- (a) Steelhead Fishing Report and Restoration Card Required. All anglers must have a Steelhead Fishing Report and Restoration Card in their possession while fishing for or taking steelhead in anadromous waters, as defined in Section 1.04. Anglers must complete and return the card pursuant to regulations in this Section and in Section 1.74. For purposes of these regulations, a steelhead trout is defined as any rainbow trout greater than 16 inches in length found in anadromous waters.
- (b) Prior to beginning fishing activity, the cardholder must record the month, day, and location code on the first available line on the report card.
- (c) When a steelhead is retained, the cardholder must immediately fill in a circle indicating whether the fish is a wild fish or a hatchery fish.
- (d) When the cardholder moves to another location code, or finishes fishing for the day, the angler must immediately record on the card the number of wild and hatchery fish that were released from that location and the number of hours fished for steelhead to the nearest hour.
- (e) In the event an angler fills in all lines and returns a Steelhead Fishing Report and Restoration Card, an additional card may be purchased. See Section 1.74.
- (f) The annual fee for the Steelhead Fishing Report and Restoration Card is specified in Section 7380 of the Fish and Game Code.

(91.1) Anadromous Waters of the Klamath River Downstream of Iron Gate Dam (Lower Klamath River Basin). The regulations in this subsection apply only to waters of the Klamath River system which are accessible to anadromous salmonids. They do not apply to waters of the Klamath River which are inaccessible to anadromous salmon and trout, for example, portions of the Klamath River system upstream of Iron Gate Dam,

portions of the Trinity River system upstream of Lewiston Dam, and the Shasta River and tributaries upstream of Dwinnel Dam. Fishing in these waters is governed by the General Regulations for non-anadromous waters of the North Coast District (see Section 7.00(a)(5)).

(A) Hook and Weight Restrictions.

1. Only barbless hooks may be used. (For definitions regarding legal hook types, hook gaps and rigging see Chapter 2, Article 1, Section 2.10.)
2. During closures to the take of adult salmon, anglers shall not remove any adult Chinook salmon from the water by any means, such as by dragging the fish on shore or using a net.

(B) General Area Closures.

1. No fishing is allowed within 750 feet of any Department of Fish and Game fish-counting weir.
2. No fishing is allowed from the Ishi Pishi Falls road bridge upstream to and including Ishi Pishi Falls from August 15 through December 31.

(C) Klamath River Basin Possession Limits.

1. Trout Possession Limits.

- a. The brown trout possession limit is 10 brown trout.
- b. The hatchery trout or hatchery steelhead possession limits are as follows:

(D) Klamath River Basin Chinook Salmon Quotas.

The Klamath River fall Chinook salmon take is regulated using quotas. Accounting of the tribal and non-tribal harvest is closely monitored from August 15 through December 31 each year. These quota areas are noted in subsection (b)(91.1)(E) with "Fall Run Quota" in the *Open Season and Special Regulations* column.

1. Quota for Entire Basin.

The 2009 Klamath River Basin quota is 30,800 Klamath River fall Chinook salmon over 22 inches total length. The department shall inform the commission, and the public via the news media, prior to any implementation of restrictions triggered by the quotas.

(NOTE: A department status report on progress toward the quotas for the various river sections is updated weekly, and available at 1-800-564-6479.)

2. Sub Quota Percentages.
