

Regulatory Language

Section 29.80, Title 14, CCR, is amended to read:

§29.80. Gear Restrictions.

(a) General Provisions.

(1) Saltwater crustaceans may be taken by hand.

(2) Nets, traps or other appliances may be not used except as provided in this Section.

(3) It is unlawful to disturb, move, or damage any trap; or remove any saltwater crustacean from a trap, that belongs to another person without written permission in possession from the owner of the trap.

(b) Hoop nets may be used to take spiny lobsters and all species of crabs. Between Point Arguello, Santa Barbara County, and the United States-Mexico border, not more than five hoop nets, as defined in (b)(1)(A) or (b)(1)(B), shall be possessed by a person when taking spiny lobster or crab, not to exceed a total of 10 hoop nets possessed when taking spiny lobster or crab, per vessel. The owner of the hoop net or person who placed the hoop net into the water shall raise the hoop net to the surface and inspect the contents of the hoop net at intervals not to exceed 2 hours.

(1) Hoop Net Defined: There are two types of hoop nets allowed for use. They shall be defined as:

(A) Type A: Fishing gear that is comprised of one to three rigid ring(s), with each ring measuring no greater than 36 inches in inside diameter nor less than 10 inches in inside diameter, which is/are connected to soft mesh thereby forming a circular-shaped net with an enclosed bottom. Lift lines shall be attached only to the top ring. A second and third rigid ring(s) may be connected by soft mesh to the top ring; however, each ring must be equal in size to or smaller than the ring above it. When the net is being raised the top ring shall be above and parallel to all other rings, with the enclosed bottom portion of the soft mesh even with or hanging below all other rings. All parts of the hoop net shall collapse and lie flat when resting on the ocean floor in such a manner that the gear does not entrap or restrict the free movement of crustaceans until lifted. When suspended from lift lines, the entire hoop net shall measure no taller than 36 inches. The ring material shall not be thicker than one inch in any dimension.

(B) Type B: Fishing gear that is comprised of two to three rigid rings (not including the bait ring), with each ring measuring no greater than 36 inches in inside diameter and the top ring measuring no less than 15 inches in inside diameter. The upper ring or rings shall be connected to the bottom ring and supported by no more than ~~four~~ six rigid support arms, and the assembled frame shall measure no more than 10 inches tall. The rings and support material shall not be thicker than one inch in any dimension. All rings shall be connected by soft mesh, thereby forming a net with an enclosed bottom, and lift lines shall be attached only to the top ring. When suspended from lift lines the enclosed bottom portion of the net shall be even with or hanging below all other rings, and the

entire net shall measure no taller than 30 inches. A bait ring may be attached to the net as long as the ring is not part of the rigid frame.

(2) Any hoop net abandoned or left unchecked for more than 2 hours shall be considered abandoned and seized by any person authorized to enforce these regulations.

(c) Crab traps shall have at least two rigid circular openings of not less than four and one-quarter inches inside diameter so constructed that the lowest portion of each opening is no lower than five inches from the top of the trap.

(d) Crab loop traps may have up to six loops.

(e) Crab trap areas: Crab traps, including crab loop traps, may be used north of Point Arguello to take all species of crabs (see regulations for take of Dungeness crabs in traps from commercial passenger fishing vessels in Section 29.85, Title 14, CCR).

(f) Shrimp and prawn traps may be used to take shrimp and prawns only. Trap openings may not exceed 1/2 inch in any dimension on traps used south of Point Conception nor five inches in any dimension on traps used north of Point Conception.

(g) Diving for crustaceans: In all ocean waters, except as provided in Section 29.05, skin and SCUBA divers may take crustaceans by the use of the hands only. Divers may not possess any hooked device while diving or attempting to dive.

(h) Hand operated appliances: Spades, shovels, hoes, rakes or other appliances operated by hand may be used to take sand crabs and shrimp.

(i) Dip nets and Hawaiian type throw nets: Shrimp may be taken with dip nets and Hawaiian type throw nets north of Point Conception.

(j) Shrimp trawls: Shrimp beam trawls may be used to take shrimp only in San Francisco Bay waters east of the Golden Gate Bridge, and in San Pablo Bay. The beam trawl frame from which the net is hung may not exceed 24 inches by 18 inches. The trawl may be towed by motorized vessels but may not be retrieved by mechanical devices. Any fish, other than shrimp, caught in the trawl must be returned immediately to the water.
