

Economic Impact Analysis

Impacts of Proposed Amendments to Title 14 CCR Sections 190 & 195
Commercial Passenger Fishing Vessel Logbooks

Creation or Elimination of Jobs within the State, the Creation of new Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California

The commission is not aware of any impact to existing businesses or jobs providing CPFV services. Since the logbooks are currently required, it is unlikely that any new businesses, or expansion of existing businesses, would be created.

There is no potential impact on the creation or elimination of jobs within the State. The proposed regulation will not have impacts to jobs and/or businesses in California.

Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State's Environment

The proposed amendments to the regulations do not have foreseeable benefits to the health and welfare of California residents or to worker safety.

The proposed regulations should benefit the State's environment by improving reporting of fish take in the California waters and the resultant analysis and recommendations that the Department may make.

The commission expects that proposed amendments and additions to the regulations concerning fishing activity records will provide a non-monetary benefit by improving the monitoring and reporting of the take of ocean fish by CPFV. The commission does not anticipate significant non-monetary benefits to the protection of public health, worker safety, the prevention of discrimination, the promotion of fairness and social equity, or to the increase in openness and transparency in business and government.
