IX. Description of Reasonable Alternatives to Regulatory Action:

(a) Alternatives to Regulation Change:

1. Number of Tags

There is no reasonable alternative to the proposed action.

2. Modify Season for Additional Hunt G-8

Modify season to include all weekdays. This proposal was considered and rejected because it would not accommodate for military operations which primarily occur on weekdays, resulting in daily hunt cancellations, hunter dissatisfaction and the unnecessary restricting of hunter opportunity.

3. Modify Season for Additional Hunt J-10

Modify season to include all weekdays. This proposal was considered and rejected because it would not accommodate for military operations which primarily occur on weekdays, resulting in daily hunt cancellations, hunter dissatisfaction and the unnecessary restriction of hunter opportunity.

4. Minor Editorial Changes

There is no reasonable alternative to the proposed action.

(b) No Change Alternative:

1. Number of Tags

The “No Change Alternative” was considered and found inadequate to attain the project objectives. Retaining the current number of tags for the hunts listed may not be responsive to changes in the status of the herds. The deer herd management plans specify objective levels for the proportion of bucks in the herds. These ratios are maintained and managed in part by modifying the number of tags. The “No Change Alternative” would not allow management of the desired proportion of bucks stated in the approved deer herd management plans.

2. Modify Season for Additional Hunt G-8

The “No Change Alternative” was considered and found inadequate to attain the project objectives. Retaining the current season length and timing would be unresponsive to Base operations, scheduled activities and unnecessarily restrict hunter opportunity.

3. Modify Season for Additional Hunt J-10

The “No Change Alternative” was considered and found inadequate to attain the project objectives. Retaining the current season length and timing would be unresponsive to Base operations, scheduled activities and unnecessarily restrict hunter opportunity.

4. Minor Editorial Changes

The “No Change Alternative” was considered and found inadequate to attain the project objectives, because inconsistencies in section and subsection references, numbering, spelling, grammar and lack of clarification would exist within the regulations, potentially leading to confusion and possible violations.

(c) Consideration of Alternatives:

In view of information currently possessed, no reasonable alternative considered would be more effective in carrying out the purposes for which the regulation is proposed, would be as effective and less burdensome to affected private persons than the adopted regulation, or would be more cost effective to affected private persons and equally effective in implementing the statutory policy or other provision of law.

X. Impact of Regulatory Action:

The potential for significant statewide adverse economic impacts that might result from the proposed regulatory action has been assessed, and the following initial determinations relative to the required statutory categories have been made:

- (a) Significant Statewide Adverse Economic Impact Directly Affecting Businesses, Including the Ability of California Businessmen to Compete with Businesses in Other States.

The proposed action will not have a significant statewide adverse economic impact directly affecting business, including the ability of California businesses to compete with businesses in other states. This proposal is economically neutral to business.

- (b) Impact on the Creation or Elimination of Jobs Within the State, the Creation of New Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California; Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State's Environment:

Currently, the season dates and tag quotas are established based on surveys and other biological assessments made by Department of Fish and Game (department) biologists during the winter of 2013. Each year the department reviews the population status of individual herds and recommends a range of possible tag quotas based on current production and over-winter survival rates. Adverse impacts to jobs and/or businesses that provide services to various regional hunting zones are not anticipated because of the relatively small number of tags issued to hunters.

Under a normal season, State big game hunters contribute about \$82,624,000 in hunting trip-related expenditures to the State's business sector. This is based on the latest, 2006 US Fish and Wildlife national survey of fishing, hunting, and wildlife associated recreation for California. Adding the indirect and induced effects of this initial revenue contribution and the total benefit to California's economy is normally about \$231,878,000. This is equivalent to about \$87,418,006 in total wage earnings to Californians, or about 1943 jobs in the state. Depending on the final season structure that the Commission adopts, the following statewide impacts to businesses may occur. The potential impacts range from 0 to 1943 jobs. The impacted businesses are generally small and localized businesses employing few individuals and, like all small businesses, are subject to failure for a variety of causes. Most of these businesses do not restrict their commerce to hunting activities alone. Additionally, the long-term intent of the proposed action is to increase sustainability in big game mammals, subsequently, the long-term viability of these same small businesses.

- (c) Cost Impacts on Representative Private Person or Business

The Fish and Game Commission is not aware of any cost impacts that a representative private person or business would necessarily incur in reasonable compliance with this proposed action.

- (d) Costs or Savings to State Agencies or Costs/Savings in Federal Funding to the State.

There are no costs or savings with regard to state agencies or federal funding to the State.

- (e) Other Nondiscretionary Costs/Savings to Local Agencies.

None

- (f) Programs Mandated on Local Agencies or School Districts.

None.

- (g) Costs Imposed on Any Local Agency or School District that is Required to be Reimbursed under Part 7 (commencing with Section 17500) of Division 4.

None.

- (h) Effect on Housing Costs.

None.

**UPDATED INFORMATIVE DIGEST
(Policy Statement Overview)**

Existing regulations provide for the season dates and number of hunting tags for the additional hunts. The original proposal changes the number of tags for all existing zones to a series of ranges as indicated in the table in the Informative Digest. After collection of fall/spring herd survey data, harvest data and subsequent population analysis, the proposal is further modified to provide the final tag quotas based on these analyses. Additionally, minor editorial changes were necessary for consistency in subsection numbering, spelling, grammar, and clarification.

The original proposal changed the number of tags to a series of tag ranges. After collection of fall/spring herd survey data, harvest data and subsequent population analysis, the proposal is further modified to provide the final tag quotas based on these analyses.

Pursuant to its April 17, 2013 meeting in Santa Rosa, the Fish and Game Commission adopted the final tag quotas (modified proposal) identified in the following table:
