STATE OF CALIFORNIA
FISH AND GAME COMMISSION
FINAL STATEMENT OF REASONS FOR REGULATORY ACTION

Amend Section 363
Title 14, California Code of Regulations
Re: Antelope

I. Date of Initial Statement of Reasons: November 7, 2012

II. Date of Final Statement of Reasons: April 18, 2013

III. Dates and Locations of Scheduled Hearings:

(a) Notice Hearing: Date: December 12, 2012
Location: San Diego

(b) Discussion Hearing: Date: March 6, 2013
Location: Mount Shasta

(c) Adoption Hearing: Date: April 17, 2013
Location: Santa Rosa

IV. Update:

Existing regulations provide for a specific number of tags (tag quotas) for antelope in
specified zones. The originally proposed language changed the number of tags to a
series of tag ranges. The originally proposed language has been modified to
establish specific tag quotas from a range for each hunt zone. Quotas were
established following the completion of surveys and data analysis to determine
population sizes. At its April 17, 2013 meeting in Eureka, the Fish and Game
Commission adopted the final tag quotas identified in the table within the Updated
Informative Digest.

V. Summary of Primary Considerations Raised in Support of or Opposition to the
Proposed Actions and Reasons for Rejecting those considerations:

No public comments, written or oral, were received during the public comment
period.

VI. Location and Index of Rulemaking File:

A rulemaking file with attached file index is maintained at:
California Fish and Game Commission
1416 Ninth Street
Sacramento, California 95814

VII. Location of Department files:
VIII. Description of Reasonable Alternatives to Regulatory Action:

(a) Alternatives to Regulatory Action:

1. Number of Tags

No alternatives were identified. Pronghorn antelope license tag quotas must be changed periodically in response to a variety of biological and environmental conditions.

(b) No change Alternative:

1. Number of Tags

The no-change alternative was considered and rejected because it would not attain project objectives of providing for hunting opportunities while maintaining pronghorn antelope populations within desired population objectives. Retaining the current tag quota for each zone may not be responsive to biologically-based changes in the status of various herds. Management plans specify minimum desired buck to doe ratios which are attained/maintained in part by modifying tag quotas on an annual basis. The no-change alternative would not allow for adjustment of tag quotas in response to changing environmental/biological conditions.

(c) Consideration of Alternatives:

In view of information currently possessed, no reasonable alternative considered would be more effective in carrying out the purposes for which the regulation is proposed, would be as effective and less burdensome to affected private persons than the adopted regulation, or would be more cost effective to affected private persons and equally effective in implementing the statutory policy or other provision of law.

IX. Impact of Regulatory Action:

The potential for significant statewide adverse economic impacts that might result from the proposed regulatory action has been assessed, and the following initial determinations relative to the required statutory categories have been made:

(a) Significant Statewide Adverse Economic Impact Directly Affecting Businesses, Including the Ability of California Businessmen to Compete with Businesses in Other States.

The proposed action will not have a significant statewide adverse economic impact directly affecting business, including the ability of California businesses to compete
with businesses in other states. This proposal is economically neutral to business.

(b) Impact on the Creation or Elimination of Jobs Within the State, the Creation of New Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California; Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State’s Environment:

Currently, the season dates and tag quotas are established based on surveys and other biological assessments made by Department of Fish and Game (department) biologists during the winter of 2013. Each year the department reviews the population status of individual herds and recommends a range of possible tag quotas based on current production and over-winter survival rates. Adverse impacts to jobs and/or businesses that provide services to various regional hunting zones are not anticipated because of the relatively small number of tags issued to hunters.

Under a normal season, State big game hunters contribute about $82,624,000 in hunting trip-related expenditures to the State’s business sector. This is based on the latest, 2006 US Fish and Wildlife national survey of fishing, hunting, and wildlife associated recreation for California. Adding the indirect and induced effects of this initial revenue contribution and the total benefit to California’s economy is normally about $231,878,000. This is equivalent to about $87,418,006 in total wage earnings to Californians, or about 1943 jobs in the state. Depending on the final season structure that the Commission adopts, the following statewide impacts to businesses may occur. The potential impacts range from 0 to 1943 jobs. The impacted businesses are generally small and localized businesses employing few individuals and, like all small businesses, are subject to failure for a variety of causes. Most of these businesses do not restrict their commerce to hunting activities alone. Additionally, the long-term intent of the proposed action is to increase sustainability in big game mammals, subsequently, the long-term viability of these same small businesses.

(c) Cost Impacts on Representative Private Person or Business

The Fish and Game Commission is not aware of any cost impacts that a representative private person or business would necessarily incur in reasonable compliance with this proposed action.

(d) Costs or Savings to State Agencies or Costs/Savings in Federal Funding to the State.

There are no costs or savings with regard to state agencies or federal funding to the State.

(e) Other Nondiscretionary Costs/Savings to Local Agencies.

None

(f) Programs Mandated on Local Agencies or School Districts.
None.

(g) Costs Imposed on Any Local Agency or School District that is Required to be Reimbursed under Part 7 (commencing with Section 17500) of Division 4.

None.

(h) Effect on Housing Costs.

None.
Updated Informative Digest/Policy Statement Overview

Existing regulations specify the number of pronghorn antelope hunting tags for each hunt zone. The final tag quotas provide for adequate hunting opportunities while allowing for a biologically appropriate harvest in specific populations. The proposed tag allocations are as set forth below.

No other modifications to the original proposal were made. Pursuant to its April 17, 2013 meeting, the Fish and Game Commission adopted the above referenced changes and final tag quotas as proposed.
