CHAPTER 1 – SUMMARY

PROPOSED PROJECT AND ALTERNATIVES

The project under consideration consists of adjustments to tag quotas for each deer hunting zone and additional hunts, modifications to existing seasons, creation of new seasons, and modifications of regulation for clarity. The Department is recommending that the Commission adopt regulations that will provide for limited public hunting of buck, antlerless and either-sex deer in a total of 44 hunting zones, 28 area-specific archery hunts, 43 additional hunts, 75 Private Lands Wildlife Habitat Enhancement and Management (PLM) Area Program hunts (PLM areas are licensed in May through September), and 10 fund-raising license tags. Hunter quotas are determined using annual deer herd survey data and deer population modeling techniques. Primary input to these models includes the results of annual deer herd surveys, herd objectives contained in approved deer herd management plans, and both hunting and non-hunting mortality. Because final hunter quotas cannot be established until late March when over-winter fawn survival is determined, the Commission is provided with a range of proposed hunting tag quotas. Upon completion of spring herd composition surveys, consultation with the Interstate Deer Committee and final population modeling, the Department will determine and recommend to the Commission final hunting tag quotas.

The Proposed Project represents management options (elements) within a particular hunt zone that will achieve a desired kill (DK) from the herd(s). DK refers to a harvest strategy that provides for a harvest of animals with a safety margin to protect against over harvesting the herd(s). This safety margin is usually in the form of reduced tag quotas and/or seasons. Alternative 2 represents management options (elements) within a particular hunt zone that will achieve a high kill (HK) from the herd(s). Alternative 3 represents management options (elements) within a particular hunt zone that will produce a relatively small harvest.

The Commission may select a combination of elements within the Proposed Project and Alternatives 2 and 3 for any particular zone because the effects of a combined project will fall within the analysis of the High kill project (Alternative 2) and the Low kill project (Alternative 3). The Commission may also select a reduced (in terms of kill) project or no-change (no project) option for any element within the Proposed Project and Alternatives 2 and 3 because the effects of such an action would fall somewhere within the analysis provided.

SUMMARY OF IMPACTS AND MITIGATION

Table 1. Impact Summary

Alternative	Significant Impact	Nature of Impact	Mitigation Available	Nature of Mitigation
Proposed Project	No	None	N/A	N/A
1. No Change	No	None	N/A	N/A
2. High Kill	No	None	N/A	N/A
3. Low Kill	No	None	N/A	N/A

The removal of individual animals through hunting, together with other natural mortality, from any of the deer herds, should not significantly reduce herd size over the annual cycle. The proposed action is expected to result in maintaining the herd ratio objectives around the approved management plan objectives. The production and survival of young animals within each herd should replace the animals removed by hunting. Therefore, the proposed action of harvesting deer by hunting should not have a significant adverse impact on either local populations or the statewide population of deer beyond the annual cycle.

Mitigation

The project has been designed to limit pain and suffering by the specification of prescribed methods of take. These method restrictions are designed to make the hunting equipment highly lethal to the target animal. Methods for taking deer are regulated during the general season under the provisions of Sections 353 and 354, Title 14, California Code of Regulations.

AREAS OF CONTROVERSY

A public scoping session regarding the preparation of environmental documents for hunting big game species was held on October 11, 2006 at the Wildlife Branch office located at 1812 Ninth Street, Sacramento. At that meeting, the use of lead ammunition to take big game animals in California (primarily within the range of the California condor) and the impact of mountain lion predation on the deer population were identified as areas of controversy.

ISSUES TO BE RESOLVED

Issues to be resolved relate to the decisions regarding how to provide public hunting of deer as an element of deer management. Specific issues to be resolved include the establishment of specific hunt areas, season dates, bag and possession limits, hunter quotas, special conditions and methods of take. Additionally, the issue of whether to adopt the proposed project or an alternative needs to be resolved.

FUNCTIONAL EQUIVALENCY

CEQA review of the proposed project will be conducted in accordance with the Commission's certified regulatory program (CRP) approved by the Secretary for the California Resources Agency pursuant to Public Resources Code section 21080.5 (See generally Cal. Code Regs., tit. 14, §§ 781.5, and 15251, subd. (b).). The California Environmental Quality Act (CEQA) requires all public agencies in the State to evaluate the environmental impacts of projects they approve, including regulations, which may have a potential to significantly affect the environment. The Department has prepared this Environmental Document (ED), which is the functional equivalent of an Environmental Impact Report, on behalf of the Commission in compliance with this requirement. The ED provides the Commission, other agencies, and the general public with an objective assessment of the potential effects.

CHAPTER 2 – THE PROPOSED ACTION

Each alternative and the Proposed Project was analyzed using KILLVARY, a computer simulation model developed to estimate deer population size and analyze the effects of various harvest strategies on deer populations. Inputs to run the model include herd composition data (Appendix 4) and prior year harvest (Appendix 5). The results for the Proposed Project and Alternatives 2 and 3 are described for each hunting zone (Appendix 3) and are accompanied by a table (Appendix 4) to aid the reader in understanding the possible effects of the hunting alternatives. Specifically, the effects of the alternative on total kill, the proportion of bucks in the herd (buck ratio) and the population size are presented. Thus, each alternative receives an equal level of consideration and analysis.

The specific process for developing the elements of the Proposed Project and Alternatives 2 and 3 for each of the zones is depicted in Figures 1 and 2. The KILLVARY Model produces a number of bucks and does that can be harvested to meet the goal/criteria for each element of the Proposed Project and Alternatives 2 and 3. In addition, a harvest buffer is developed and evaluated for each alternative by hunt zone. The harvest buffer is an additional number of deer (unallocated) that could be harvested within the hunt zone that would not have a significant adverse effect on the deer population. Additionally, the number of bucks and does expected to be killed on PLMs and by archery only hunters are subtracted from the harvest allocation (Figure 2). The remaining number of bucks and does are then allocated to the hunts listed under each alternative based on the desired harvest and on past and expected hunter caused mortality rates for each hunt. New hunt tag quotas are based on estimated hunter caused mortality rates of similar existing hunts either in the same or similar zone.

Figure 1. Alternative Evaluation Process

Figure 2. Tag and Season Allocation Process

This process results in the tag range and/or hunt season listed for each of the hunts under the Proposed Project and Alternatives 2 and 3.

The harvest buffer allocation is to allow for small adjustments in tag quotas or hunts, new PLMs, new Section 554 areas, and new hunts that might be proposed by the public during the Commission meetings. The buffers have been developed such that whether or not any part of the buffers are eventually allocated, the hunts will have no significant adverse effect on the deer resource or the ability of the project to achieve its goals.

Section 360(a) – A, B, C, and D Zone Hunts

1. Number of Tags

Existing regulations provide for the number of hunting tags for the A, B, C, and D zones. The proposal changes the number of tags for all existing zones to a series of ranges (See Appendix 1).

The proposal provides a range of tag numbers for each zone from which a final number will be determined, based on the post-winter status of each deer herd. These ranges are necessary, as the final number of tags cannot be determined until spring herd data are collected in March/April.

In early spring, surveys of deer herds are conducted to determine the proportion of fawns that have survived the winter. This information is used in conjunction with the prior year harvest and fall herd composition data to estimate overall herd size, sex and age ratios, and the predicted number of bucks available next season. The number of bucks and does needs to be estimated prior to the hunting season to determine how many surplus bucks will exist over and above the number required to maintain the desired buck ratio objectives stated in the approved deer herd management plans.

The actual tag numbers for each affected zone will be selected and authorized by the Fish and Game Commission from the range of values provided by this proposal. The number of tags is intended to allow the appropriate level of hunting opportunity and harvest of bucks in the population, while achieving or maintaining the buck ratios at, or near, objective levels set forth in the approved deer herd management plans. These final values for the license tag numbers will be based upon findings from the annual harvest and herd composition counts. However, under circumstances where severe winter conditions adversely effect herd recruitment and over-winter adult survival, final tag quotas may fall below the proposed tag range

Section 360(b) – X Zone Hunts

1. Number of Tags

Existing regulations provide for the number of hunting tags for the X zones. The proposal changes the number of tags for all existing zones to a series of ranges (See Appendix 1).

The proposal provides a range of tag numbers for each zone from which a final number will be determined, based on the post-winter status of each deer herd. These ranges are necessary, as the final number of tags cannot be determined until spring herd data are collected in March/April.

In early spring, surveys of deer herds are conducted to determine the proportion of fawns that have survived the winter. This information is used in conjunction with the prior year harvest and fall herd composition data to estimate overall herd size, sex and age ratios, and the predicted number of bucks available next season. The number of bucks and does needs to be estimated prior to the hunting season to determine how many surplus bucks will exist over and above the number required to maintain the desired buck ratio objectives stated in the approved deer herd management plans.

The actual tag numbers for each affected zone will be selected and authorized by the Fish and Game Commission from the range of values provided by this proposal. The number of tags is intended to allow the appropriate level of hunting opportunity and harvest of bucks in the population, while achieving or maintaining the buck ratios at, or near, objective levels set forth in the approved deer herd management plans. These final values for the license tag numbers will be based upon findings from the annual harvest and herd composition counts. However, under circumstances where severe winter conditions adversely effect herd recruitment and over-winter adult survival, final tag quotas may fall below the proposed tag range.

Section 360(c and d) – Additional Hunts

1. Number of Tags

Existing regulations provide for the number of hunting tags in the Additional Hunts. The proposal changes the number of tags for all existing hunts to a series of ranges (See Appendix 1).

The proposal provides a range of tag numbers for each hunt from which a final number will be determined, based on the post-winter status of each deer herd. These ranges are necessary, as the final number of tags cannot be determined until spring herd data are collected in March/April.

In early spring, surveys of deer herds are conducted to determine the proportion of fawns that have survived the winter. This information is used in conjunction with the prior year harvest and fall herd composition data to estimate overall herd size, sex and age ratios,

and the predicted number of bucks available next season. The number of bucks and does needs to be estimated prior to the hunting season to determine how many surplus bucks will exist over and above the number required to maintain the desired buck ratio objectives stated in the approved deer herd management plans.

The actual tag numbers for each affected hunt will be selected and authorized by the Fish and Game Commission from the range of values provided by this proposal. The number of tags is intended to allow the appropriate level of hunting opportunity and harvest of bucks in the population, while achieving or maintaining the buck ratios at, or near, objective levels set forth in the approved deer herd management plans. These final values for the license tag numbers will be based upon findings from the annual harvest and herd composition counts. However, under circumstances where severe winter conditions adversely effect herd recruitment and over-winter adult survival, final tag quotas may fall below the proposed tag range.

2. Modify Season for Additional Hunt G-8

Existing regulations for Additional Hunt G-8 (Fort Hunter Liggett Antlerless Deer Hunt) provide for hunting on Saturdays, Sundays, and the Columbus Day holiday only beginning the first Saturday in October and extending for two consecutive weekends. The Base has specifically requested the season be modified to begin on the Thursday preceding the Columbus Day weekend and run for five consecutive days to accommodate Base operations and other hunt opportunities.

The proposal would modify the season by consolidating a hunt season consisting of two weekends and a holiday into a five consecutive day season in order to accommodate other hunts and Base operations. No loss of hunter opportunity would result from this action and the proposal is consistent with existing deer herd management plan recommendations.

3. Modify Season and Special Conditions for Additional Hunt G-10

Existing regulations for Additional Hunt G-10 (Camp Pendleton Either-Sex Deer Hunt) provide for hunting on Saturdays, Sundays, Columbus and Veteran's Day, and the day after Thanksgiving, beginning the third Saturday in September and continuing through the Thanksgiving Day weekend. Certain federal holidays occur on weekdays when the Base is normally closed and additional hunter opportunity has been lost. The Base has specifically requested: the season be lengthened by adding two weeks to the beginning of the season; one week to the end of the season; include all holidays and the day after Thanksgiving, in order to provide additional hunter opportunity. In addition, the Base has requested that additional weekdays be included at the discretion of the Commanding Officer for those days when military operations have been suspended or reduced.

The proposal would modify the season to begin on the first Saturday in September and extend through the first Sunday in December; specifically include all holidays; and allow the Commanding Officer discretion, with Department concurrence, to provide additional hunt days on weekdays during the season should military operations be suspended. Special conditions are also adjusted to account for the additional three weeks added to the season. These actions would provide an increase in hunter opportunity as requested by the Base, while maintaining consistency with existing deer herd management plan recommendations.

4. Modify Season for Additional Hunt J-10

Existing regulations for Additional Hunt J-10 (Fort Hunter Liggett Junior Either-Sex Deer Hunt) provide for hunting on Saturdays, Sundays, and the Columbus Day holiday only beginning the first Saturday in October and extending for two consecutive weekends. The Base has specifically requested the season be modified by adding two days to the beginning of the season in order to provide additional junior hunting opportunity.

The proposal would modify the season by adding two days to the beginning of the season (Thursday and Friday). These actions would result in increased hunter opportunity, and are consistent with existing deer herd management plan recommendations.

Section 361 – Archery Deer Hunting

1. Number of Tags

Existing regulations provide for the number of hunting tags in the Additional Hunts. The proposal changes the number of tags for all existing hunts to a series of ranges (See Appendix 1).

The proposal provides a range of tag numbers for each hunt from which a final number will be determined, based on the post-winter status of each deer herd. These ranges are necessary, as the final number of tags cannot be determined until spring herd data are collected in March/April.

In early spring, surveys of deer herds are conducted to determine the proportion of fawns that have survived the winter. This information is used in conjunction with the prior year harvest and fall herd composition data to estimate overall herd size, sex and age ratios, and the predicted number of bucks available next season. The number of bucks and does needs to be estimated prior to the hunting season to determine how many surplus bucks will exist over and above the number required to maintain the desired buck ratio objectives stated in the approved deer herd management plans.

The actual tag numbers for each affected hunt will be selected and authorized by the Fish and Game Commission from the range of values provided by this proposal. The number of tags is intended to allow the appropriate level of hunting opportunity and harvest of bucks in the population, while achieving or maintaining the buck ratios at, or near, objective levels set forth in the approved deer herd management plans. These final values for the license tag numbers will be based upon findings from the annual harvest and herd composition counts. However, under circumstances where severe winter conditions adversely effect herd recruitment and over-winter adult survival, final tag quotas may fall below the proposed tag range.

2. Establish New Area-Specific Archery Hunt A-33

Existing regulations provide deer hunting area descriptions, seasons, bag and possession limits, and number of tags for Zone A. The zone currently provides limited late season archery deer hunting opportunities in the zone, Hunt A-32 (Ventura/Los Angeles Late Season Archery Either-Sex Deer Hunt). In an effort to increase opportunity for archery method hunters, provide a higher expectation of success, and meet public demand for increased hunter opportunity while meeting approved deer herd plan objectives, the proposal would establish a new late season archery hunt opportunity in Zone A on the Fort Hunter Liggett Military Base.

The proposal creates a new Area-Specific Archery Hunt, A-33 (Fort Hunter Liggett Late Season Archery Either-Sex Deer Hunt). The area would include that portion of Monterey County lying within the exterior boundaries of the Hunter Liggett Military Reservation, except as restricted by the Commanding Officer. The season would be open on Saturdays, Sundays and holidays only beginning the first Saturday in October and continuing through the Veteran's Day holiday in November, except if rescheduled by the Base Commander between the season opener and December 31 with Department concurrence. The bag and possession limit would be one, either-sex deer with a recommended tag quota range of 20-100 tags to be split between military only personnel, distributed by the Base; and the general public, distributed through Department drawing. Special conditions would include a tag refund exchange policy in case of hunt cancellation by the Commanding Officer. This proposal would meet an expressed public demand for increased late season and archery hunting opportunity, maintain appropriate harvest levels within the Hunter Liggett Military Reservation and Zone A deer herds, and be consistent with existing deer herd management plan recommendations.

The actual tag numbers for each affected hunt will be selected and authorized by the Fish and Game Commission from the range of values provided by this proposal. The number of tags is intended to allow the appropriate level of hunting opportunity and harvest of bucks in the population, while achieving or maintaining the buck ratios at, or near, objective levels set forth in the approved deer herd management plans. These

final values for the license tag numbers will be based upon findings from the annual harvest and herd composition counts. However, under circumstances where severe winter conditions adversely effect herd recruitment and over-winter adult survival, final tag quotas may fall below the proposed tag range.

BACKGROUND AND EXISTING CONDITION

Background

Deer management in California is guided by State law and policies of the Commission and the Department. The goals of deer management are to encourage the conservation, restoration, maintenance and utilization of California's wild deer populations. Deer herd management plans were developed to: (1) assure that conservation of deer is in accordance with maintaining sufficient deer populations and habitat to provide for the beneficial use and enjoyment of wildlife by all citizens of the State; (2) perpetuate deer for their intrinsic and ecological values, as well as for their direct benefits to man; and (3) provide for aesthetic, educational and nonappropriative uses of deer. The objectives of the plans are to restore and maintain healthy deer herds in the wild state and to provide for high-quality and diversified use of deer in California.

As specified in the Fish and Game Code (sections 450-460), deer are managed on a unit basis, where a unit consists of an individual deer herd or group of similar herds. Individual deer herd management objectives are contained in 80 plans, which were prepared by the Department in conjunction with land management agencies, private landowners and the general public. The actions recommended in the herd plans include programs to: obtain information needed about deer; maintain and increase the quality of deer habitat statewide, including the identification, maintenance and management of critical deer habitat; reduce natural mortalities; decrease the illegal taking of deer through modern law enforcement; and provide for both hunting and nonhunting uses of deer, consistent with the inherent productivity of individual deer herds.

The project discussed in this document is deer hunting, a portion of the utilization element of each deer herd management plan. Deer hunting is conducted via a "management by objectives" approach. As such, the deer population in each management unit is monitored, and the status is compared to objectives for each unit. When the status of the deer in each unit changes from the objective, recommendations are made to the Commission to modify the deer hunting regulations for that unit. Deer hunting strategies in individual units are commonly changed by modifying the timing or length of the hunting season, modifying the number of hunters, changing the method of take, changing the type of deer (buck, antlerless or both) to be harvested or by adding or removing an additional hunt to a portion of the unit. The best management strategy for hunting in a given unit is dictated by the current status of the deer in the unit, the deer

herd management plan objectives, Department field biologist recommendations, local conditions and public input.

In 1977, legislation (Assembly Bill 1521, Chapter 839) was introduced by Assemblyman Perino which became the backbone of modern deer management in California. The laws, sections 450 through 460, Fish and Game Code, specify the policy of the Legislature, define general deer hunting, provide direction to the Department about managing deer, specify the content of the annual report to the Legislature and direct the Department regarding hunting regulations.

Section 450 declares that it is the policy of the Legislature to encourage the conservation, restoration, maintenance and utilization of California's wild deer populations. Such conservation shall be in accordance with the principles of wildlife resources conservation set forth in Section 1801, Fish and Game Code, and in accordance with the objectives and elements stated in *A Plan for California Deer* (California Department of Fish and Game, 1976). The objectives stated in *A Plan for California Deer* are to restore and maintain healthy deer herds in the wild state and to provide for high-quality and diversified use of deer in California. The objective of the proposed project, therefore, is to implement the Plan's direction to provide high quality and diversified use of deer through public deer hunting.

Section 451 defines the "general deer hunting season" as the annual season for the area in question, as set by the Commission under its general regulatory powers, or as set by statute, for the taking of male deer.

Section 452 directs the Department to designate deer herd management units and a manager for each unit. The units are to be single deer herds or groups of deer herds having similar management and habitat requirements and characteristics. Boundaries of such units need not follow county boundary lines.

Sections 453 through 455 direct the Department to develop plans for deer herd management units. The objectives of such plans shall be the restoration and maintenance of healthy deer herds in the wild state and to provide for high-quality and diversified use of deer in California. The management plans are to contain programs to: obtain information needed about deer; maintain and increase the quality of deer habitat statewide, including the identification, maintenance and management of critical deer habitat; reduce natural mortalities; decrease the illegal taking of deer through modern law enforcement; and provide for both hunting and non-hunting uses of deer, consistent with the basic individual deer herd management unit capabilities. Specifically, the plans discuss the past history of each deer herd and document existing information for each herd. Current problems are listed, and solutions are identified as recommended actions in each of seven elements of deer management: (1) inventory and investigation; (2) habitat; (3) mortality; (4) utilization; (5) law enforcement; (6) communication of

information; and (7) review and update. The plans are to be reviewed annually and shall be the basis for Department's recommendations to the Commission.

Section 456 directs the Department to produce a biennial report to the Legislature and to the Commission on the progress that is being made toward the restoration and maintenance of California's deer herds. Details of the content of the report are discussed in this Chapter under "Reports to the Legislature and Fish and Game Commission". Additionally, the Department shall not recommend to the Commission any deer management program or any modification of the Commission's deer hunting regulations unless they are consistent with deer herd management plans.

Sections 457 through 459 direct the Department to notify the Commission and specified county boards of supervisors of its intent to recommend the taking of antlerless and either-sex deer prior to the Commission's regulation-setting process. Boards of supervisors of 37 of the 58 counties have the authority to modify or veto any Department recommendations for harvesting antlerless and/or either-sex deer, based upon testimony presented at a hearing of the board and the submission of a resolution by the board to the Commission.

Section 460 requires the Department to notify the Commission prior to its regulation-setting process of deer herd units to be placed under a general season and whether any antlerless deer should be taken. If the Department believes that current hunter numbers would adversely affect the deer herd, impair the hunting experience or endanger the public safety, the Department shall also recommend restrictions on hunter numbers. The Department shall inform the Commission of the condition of each deer herd unit, and the Commission shall make the information known to the public.

In addition to sections 450 through 460, other State laws provide for management of wildlife, including deer, on private and military lands for control of depredation due to deer, increased access to the public, and protection and enhancement of habitats.

Sections 3400 through 3408 of the Fish and Game Code provide for the management of fish and wildlife on private lands, and Section 3409 of the Fish and Game Code requires the Department to report every three years to the Speaker of the Assembly, the Chairman of the Senate Committee on Rules, and the chairmen of the policy committees of each house on the participants of the PLM Program, the wildlife management activities undertaken, the wildlife species managed and the harvest data.

Statutes similar to those for management of fish and wildlife on private lands are in sections 3450 through 3453 of the Fish and Game Code for management on military lands.

Section 4181.5 of the Fish and Game Code provides for the taking of deer by a landowner with property which is damaged or in immediate danger of being damaged. This Section directs the Department to issue a permit for taking depredating deer when evidence indicates that damage or the threat of damage has occurred. In lieu of these permits, with the consent of the landowner, the Commission may issue permits to licensed hunters to take deer to stop the damage or threatened damage to private property (Section 4188, Fish and Game Code).

Section 4334 of the Fish and Game Code provides authority for the Fish and Game Commission to direct the Department to authorize the sale of not more than ten fund-raising deer license tags. Since the 1996 deer hunting season, the Fish and Game Commission has directed the Department to authorize the sale of ten fund-raising deer license tags annually. These tags were offered for sale by nonprofit organizations selected by the Department through the Invitation For Bid process. Pursuant to Section 4334, all funds derived from the sale of these tags are continuously appropriated for use by the Deer Herd Management Plan Implementation Program. These funds will augment, not supplement, any other funds appropriated by the Department to implement this program.

Section 4370 of the Fish and Game code requires that an archery season be authorized in each zone with a general open season. The season for each area shall be as the Commission prescribes, except that a minimum interposing interval of three days immediately preceding the general open season must occur.

1. The holder of an Open Zone tag shall meet any special conditions and take deer using the method of take authorized for the general deer zone, additional deer hunt, or area-specific archery hunt as described in subsections 360(a), (b), (c) and subsections 361(a) and (b), Title 14, CCR.

2. Fund-raising license tagholders who receive a deer tag pursuant to Section 708(a)(2), Title 14, CCR, shall be allowed to exchange that tag under the provisions of Section 708(a)(2)(F), Title 14, CCR. Tagholders shall not be entitled to obtain more than two (2) deer tags as described in subsection 708(a)(2), Title 14, CCR.

3. Tagholders shall report to the Regional Patrol Chief at the appropriate Department of Fish and Game Regional Headquarters prior to hunting to inform law enforcement officials of the time and area they intend to hunt.

e. Legal boundary description of the project area:

Open Zone tags shall be valid in the general deer zones, additional deer hunts, and area-specific archery hunts as described in subsections 360(a), (b), (c) and subsections 361(a) and (b), Title 14, CCR.

108. Cooperative Deer Hunting Area hunts (Section 554, Title 14, CCR).

In 2006, a total of 182 tags were issued through the Section 554 - Cooperative Deer Hunting Area Program.

a. Season: Section 554 - Cooperative Deer Hunting Area seasons correspond to the general season for the X zone in which they are issued.

b. Bag and Possession Limit: One buck, forked horn (see subsection 351(a), Title 14, CCR) or better per tag.

c. Number of Tags: Buck Tags: 0-1,000

d. Special Conditions:

1. Section 554 - Cooperative Deer Hunting Area may consist of private land under the control of one or more owners, at least 640 acres in size, within, or adjacent to 5,000

acres of critical deer habitat in deer quota zones (see Section 360) which require public drawing for the distribution of deer tags (see Section 708).

2. Applicants for Section 554 - Cooperative Deer Hunting Area permits shall be the owner of said land.
3. No individual may submit more than one Section 554 - Cooperative Deer Hunting Area application or deer tag application per deer season, nor may there be more than two cooperative deer hunting area applicants for a given parcel of land.
4. To obtain a Section 554 - Cooperative Deer Hunting Area deer tag, applicants must submit a 2007 First Deer Tag Application for exchange with their area application.
5. Deer tags issued pursuant to a Section 554 - Cooperative Deer Hunting Area permit are valid only during the season for the deer zone specified and may only be used on private lands specified in the landowner's application.
- e. Legal boundary description of the project area:

Private lands, properly posted, as identified within the approved Section 554 - Cooperative Deer Hunting Area application.

109. Private Lands Wildlife Habitat Enhancement and Management (PLM) Area Program hunts (Section 601, Title 14, CCR).

In 2006, 90 PLMs encompassing 895,640 acres statewide were licensed in the program. Seventy-five of these areas included deer hunting as part of their management program.

- a. Season: PLM seasons vary depending upon the location of the area, the number of deer to be harvested, and the length of time the area has been in the program (no variation from the general season for the zone in which the PLM is located is permitted during a PLM's initial year).
- b. Bag and Possession Limit: One buck, forked horn (see subsection 351(a), Title 14, CCR) or better, or one antlerless deer (see subsection 351(b), Title 14, CCR) per tag. Buck, antlerless, and either-sex deer tags are options for PLM areas.
- c. Number of Tags:

Buck Tags:	100-1,200
Antlerless Tags:	100-1,200
Either-Sex Tags:	100-1,200
- d. Special Conditions:
 1. In order to purchase a PLM tag, hunters must exchange a valid 2007 California deer tag application, or a valid, unfilled 2007 California deer tag with the PLM area they wish to hunt.
 2. No person shall take more than one buck deer in the X zones, as defined in subsection 360(b).
- e. Legal boundary description of the project areas:

Private lands, properly posted, as identified within the individual PLM management plans.

Policy Considerations

The Legislature formulates laws and policies regulating the management of fish and wildlife in California. The general wildlife conservation policy of the State is to encourage the conservation and maintenance of wildlife resources under the jurisdiction and influence of the State (Section 1801, Fish and Game Code). The policy includes several objectives, as follows:

1. To provide for the beneficial use and enjoyment of wildlife by all citizens of the State;
2. To perpetuate all species of wildlife for their intrinsic and ecological values, as well as for their direct benefits to man;
3. To provide for aesthetic, educational, and non-appropriative uses of the various wildlife species;
4. To maintain diversified recreational uses of wildlife, including hunting, as proper uses of certain designated species of wildlife, subject to regulations consistent with the maintenance of healthy, viable wildlife resources, the public safety, and a quality outdoor experience;
5. To provide for economic contributions to the citizens of the State through the recognition that wildlife is a renewable resource of the land by which economic return can accrue to the citizens of the State, individually and collectively, through regulated management. Such management shall be consistent with the maintenance of healthy and thriving wildlife resources and the public ownership status of the wildlife resource;
6. To alleviate economic losses or public health and safety problems caused by wildlife; and
7. To maintain sufficient populations of all species of wildlife and the habitat necessary to achieve the above-stated objectives.

The Legislature has delegated authority to regulate the take and possession of wildlife to the commission, whose members are appointed by the Governor. With respect to deer, the Legislature has established the State's policy regarding hunting in Sections 450 - 460 of the Fish and Game Code, which provides that the department shall recommend to the commission those deer herd units to be placed under a general deer hunting season; include the number, if any, of antlerless deer that should be taken in deer herd units; and recommend the establishment of any hunter-restricted quota units, if needed. Additionally, Section 4334 of the Fish and Game Code specifies that the Department shall authorize not more than 10 deer tags for the purpose of raising funds for programs and projects to benefit deer. These fund-raising tags are not subject to the fees prescribed by Section 4332. All funds derived from the sale of these tags are appropriated to the department to be used for the Deer Herd Management Plan Implementation Program.

Potential for Significant Effects

Table 2 describes the modifications from the 2006 deer hunting regulations the Department is proposing to incorporate in the 2007 deer hunting regulations. One (1) new hunt and modifications to three (3) existing hunts are proposed. Modifications from the 2006 deer hunting season consist of 175 additional tags and an additional twenty-three hunt days.

Table 2 – Current Regulations and Proposed Modifications

Zone/Hunt	Current 2006 Tag Quota	Current 2006 Season	Proposed 2007 Tag Quota	Proposed 2007 Season	Proposed Change In Tag Quota	Proposed Change In Season Length

Table 3 describes the impacts these modifications will have on the twenty-one (21) factors examined in each of the prior sixteen (16) environmental documents (1989 through 2004 – Department files) certified by the Fish and Game Commission regarding deer hunting. The modifications proposed are to increase hunter opportunity on the military installations specified, and the tag quota's and season (timing and length) have been established to have no effect on the State's deer population.

Sport hunting is a controversial issue. A segment of the public has contended that the loss of a single animal by hunting is a significant impact by virtue of the mortality of the individual. Because the activity of hunting deer will result in the death of individual animals, specific safeguards are included in the proposed action. These safeguards include limited quotas, specified seasons, bag and possession limits, authorized lethal methods, and herd monitoring, which should result in removing deer at a level that is consistent with individual herd performance. Therefore, the proposed actions have been designed to avoid significant adverse effects on the environment.

The removal of individual animals through hunting, together with other natural mortality, from any of the deer herds, should not significantly reduce herd size over the annual cycle. The proposed action is expected to result in maintaining the herd ratio objectives around the approved management plan objectives. The production and survival of young animals within each herd should replace the animals removed by hunting. Therefore, the proposed action of harvesting deer by hunting should not have a significant adverse impact on either local populations or the statewide population of deer beyond the annual cycle.

CHAPTER 3 - ALTERNATIVES

No Project

Other than annual tag quota modifications proposed in response to herd productivity, implementation of the No Project alternative would result in no change from the 2006 deer hunting regulations described in the “Existing Condition” section of Chapter 2.

Alternative 2 - High Kill

Alternative 2 represents management options (elements) within a particular hunt zone that will achieve a high kill (HK) from the herd(s). HK refers to a harvest strategy that maximizes the number of animals that can be harvested from a population, commensurate with the goals and objectives stated in the herd plans, for at least the next year. A potential problem with a HK management strategy is the risk of overharvesting. If, under a HK program, an overharvest occurred, more conservative management strategies would have to be implemented the following year to correct the situation.

Appendix 2 contains specific zone and hunt HK alternatives; Appendix 3 contains results of the population modeling analysis for the HK alternative.

Alternative 3 - Low Kill

Alternative 3 represents management options (elements) within a particular hunt zone that will produce a relatively small harvest. This low kill (LK) is a harvest strategy that provides hunting opportunities at reduced levels from those proposed under either HK or desired kill (DK) strategies.

Appendix 2 contains specific zone and hunt LK alternatives; Appendix 3 contains results of the population modeling analysis for the LK alternative.

CHAPTER 4 – RESPONSES TO COMMENTS REGARDING THE PROPOSED PROJECT

In accordance with CEQA, public input and agency consultation were encouraged during the environmental review process. A Notice of Preparation was provided to the State Clearinghouse, land management agencies having a key role in deer management, and all individuals and organizations which expressed an interest in deer management. No comments were received as a result of the Notice of Preparation circulation.

The Department prepared a draft environmental document (DED) regarding deer hunting (sections 360, 361, 554, and 601, Title 14, CCR). The DED was made available for public review on February 3, 2007. It was mailed to 57 libraries as well as 20 individuals and organizations who expressed interest in this issue. Additionally, notice of availability of the DED for public review was provided to the State Clearinghouse, which provided notice of availability to interested organizations, including all county governments in California. The DED was also made available on the Department's website, and in the Department's regional and satellite offices. During the 45-day notice period the draft environmental document was available for public review and one e-mail comment was received regarding the document.

The draft environmental document examined a variety of alternatives. The proposed project was recommended by the Department because it provided the public with the widest range of recreational opportunities related to deer populations, either statewide or locally. Every effort was made to avoid a biased analysis of issues. In general, the Department attempted to make the draft environmental document understandable to the public and to objectively summarize a large amount of technical information.

The following is the comment and the Department's response.

Comment from Mr. David J. Valle

Comment: "Double the proposed tag range allocation for Hunt J16 from 10-75 tags to 20-150 tags in Alternative 1. And if spring census data for this zone is supportive, increase the tag allocation to the upper portion of this new range (100-150 tags issued)."

Response: The A, B, and D zone complexes are managed to maximize the hunter's opportunity to go hunting without any overall impact to the population size. This is accomplished by maintaining high tag quota's and adjusting them accordingly based on an index of hunter success, fall composition counts, and population trends. Population data which indicates an increase in any one year is not a trend and must be analyzed in conjunction with the other factors identified to justify any tag increases in these zones.

The harvest buffer is established to account for unpredictable mortality factors such as favorable hunting weather (early weather causes deer to be more susceptible to hunting loss) disease, accidental death (including road kill), and wounding/crippling loss. Although the harvest buffer on occasion may be utilized to account for higher than predicted mortality (due to hunting and/or the other factors identified above) it should not be relied upon for permanent increases in tag quotas. Reducing the harvest buffer increases the chances for over-shooting the population.

The Department agrees it is important to provide junior hunting opportunity. Juniors are currently able to receive tags to hunt the general season in all of these zones in addition to J16. Increasing the number of tags available for this hunt would cause decreases in bucks available to other general season hunters in opposition to the management strategy for this zone. The Department appreciates the Plumas Fish and Game Commissioners assurances that any approval necessary from the Plumas County Board of Supervisors will be received. However, since this is an either-sex hunt increasing the number of tags available to the level suggested will likely result in an increase in bucks taken that may lead to a reduction in general hunter opportunity.

Subject: Public Comment on Proposed Envir Doc for Deer Hunting

Date: March 6, 2007

To: California Department of Fish and Game, Wildlife Branch
California Department of Fish and Game Commission

The following are my comments on the proposed Environmental Document for California Deer Hunting (Feb 3 2007):

1. Double the proposed tag range allocation for Hunt J16 from 10 - 75 tags to 20 - 150 tags in Alternative 1. And if spring census data for this zone is supportive, increase the tag allocation to the upper portion of this new range (100 - 150 tags issued).

Justification/Comments:

a. Preseason population estimates (See Appendix 4-1) for 2007 are up by ~300 animals. Using the kill percentage from 2006 for J16 hunters of ~ 19% as a guide (Appendix 5), doubling the take will have an insignificant impact on the herd population, but offer a significant (100% opportunity improvement) increase in the participation of Junior Hunters in this zone.

b. Referring to Appendix 3-12, there is a substantial Buffer Population of does and bucks to support an increased tag allocation.

c. If approval of the county board of supervisors is required to increase tag allocation, I am confident as a member of the Plumas County Fish and Game Commission that such approval will be granted in Plumas County.

Please seriously consider my request to increase the tag allocation for Hunt J16. The more opportunity we offer the youth hunters, the more likely they will develop an affinity for wildlife and become the stewards that we desperately need for California wildlife.

Please confirm your receipt of my comments.

Respectfully,

David J. Valle

APPENDIX 1

REGULATORY LANGUAGE FOR PROPOSED PROJECT

Appendix 1 contains the proposed project regulatory language for Sections 360 and 361, Title 14, California Code of Regulations. Recommended changes are provided in strikeout/underline format and highlighted.

§ 360. Deer.

Except as otherwise provided in this Title 14, deer may be taken only as follows:

(a) A, B, C, and D Zone Hunts.

(1) Zone A.

(A) Area: Shall include all of Zone A-South Unit 110 and Zone A-North Unit 160 (see subsections 360(a)(1)(A)1. through 2.).

1. South Unit 110. In those portions of Alameda, Contra Costa, Fresno, Kern, Kings, Los Angeles, Monterey, San Benito, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Stanislaus and Ventura counties within a line beginning at the intersection of Highway 99 and the San Joaquin-Sacramento county line at Dry Creek; south on Highway 99 to Highway 166 in Kern County; west on Highway 166 to Highway 33; south on Highway 33 to Sespe Creek; east and south along Sespe Creek to Highway 126; east on Highway 126 to Interstate 5; south on Interstate 5 and 405 to Interstate 10; west on Interstate 10 to the Pacific Ocean; north on the Pacific Ocean coastline to the San Mateo-San Francisco county line; east on the San Mateo-San Francisco county line to the Alameda county line; north on the Alameda-San Francisco county line to the Contra Costa-San Francisco county line; northwest on Contra Costa-San Francisco county line to the Contra Costa-Marin county line; northeast on the Contra Costa-Marin county line to the Contra Costa-Solano county line in San Pablo Bay; east on the Contra Costa-Solano county line and the Sacramento River to the confluence of the San Joaquin River and Sacramento-Contra Costa county line; east on the Sacramento-Contra Costa county line and San Joaquin River to the confluence of the Mokelumne River and San Joaquin-Sacramento county line; northeast on the San Joaquin-Sacramento county line and Mokelumne River to the confluence of Dry Creek; east on the San Joaquin-Sacramento county line and Dry Creek to the point of beginning at Highway 99.

2. North Unit 160. In those portions of Colusa, Glenn, Lake, Marin, Mendocino, Napa, Sacramento, Solano, Sonoma and Yolo within a line beginning at the junction of the mouth of Hardy Creek (Mendocino County) and the Pacific Ocean; east along Hardy Creek to Highway 1; north along Highway 1 to Highway 101; south along Highway 101 to Commercial Avenue in the town of Willits; east on Commercial Avenue to the Hearst-Willits Road (County Road 306); north and east on the Hearst-Willits Road to the Main Eel River; southeast on the Main Eel River to Lake Pillsbury at Scott Dam; southeast along the west shore of Lake Pillsbury and the Rice Fork of the Eel River to Forest Service Road M-10; east on Forest Service Road M-10 to Forest Service Road 17N16; east on Forest Service Road 17N16 to Forest Service Road M-10; east on Forest Service Road M-10 to Letts Valley-Fouts Spring Road; east on the Letts Valley-Fouts Spring Road to the Elk Creek-Stonyford Road (County Road 306); north on the Elk Creek-Stonyford Road to the Glenn-Colusa county line; east along the Glenn-Colusa County line to Interstate 5; Interstate 5 south to Highway 99 in the City of Sacramento; Highway 99 south to the Sacramento/San Joaquin County line at Dry Creek, west along the Sacramento/San Joaquin County line and Dry Creek to the confluence with the Mokelumne River, southwest on the Sacramento/San Joaquin County line and Mokelumne River to the confluence with the San Joaquin River and Sacramento/Contra Costa County line, west on the Sacramento/Contra Costa County line and San Joaquin River to the confluence of the Sacramento River and Solano/Contra Costa County line, west on the Sacramento River and Solano/Contra Costa County line to the Marin County line in San Pablo Bay, southwest on the Marin/Contra Costa and Marin/San Francisco county lines to the North Peninsula shoreline near the Golden Gate Bridge, west on the shoreline to the Pacific Ocean coastline, northwest on the Pacific Ocean coastline to the point of beginning.

(B) Season: The season in Zone A-South Unit 110 and Zone A-North Unit 160 shall open on the second Saturday in August and extend for 44 consecutive days.

(C) Bag and Possession Limit: One buck, forked horn (see subsection 351(a)) or better, per tag.

(D) Number of Tags: ~~65,000~~30,000-65,000. Zone A tags are valid in Zone A-South Unit 110 and Zone A-North Unit 160.

(2) Zone B.

(A) Area: Shall include all of Zones B-1, B-2, B-3, B-4, B-5 and B-6 (see subsections 360(a)(2)(A) 1-6).

1. Zone B-1.

In the County of Del Norte and those portions of Glenn, Humboldt, Lake, Mendocino, Siskiyou and Trinity counties within a line: Beginning at the California-Oregon state line and the Pacific Ocean; east along the state line to the point where Cook-Green Pass Road (Forest Service Road 48N20) intersects the California-Oregon state line; south on the Cook-Green Pass Road to Highway 96 near Seiad Valley; west and south along Highway 96 to Highway 299 at Willow Creek; southeast along Highway 299 to the South Fork of the Trinity River; southeast along the South Fork of the Trinity River to the boundary of the Yolla Bolly-Middle Eel Wilderness Area; southwest along the boundary of the Yolla Bolly-Middle Eel Wilderness Area to the Four Corners Rock-Washington Rock Trail; south and east on the Four Corners Rock-Washington Rock Trail to the North Fork of Middle Fork Eel River; south on the North Fork of Middle Fork Eel River to Middle Fork Eel River; east on Middle Fork Eel River to confluence with Balm of Gilead Creek; north and east on Balm of Gilead Creek to confluence with Minnie Creek; east and south on Minnie Creek to Soldier Ridge Trail; north on Soldier Ridge Trail to Summit Trail; south on Summit Trail to Green Springs Trail head at Pacific Crest Road (U.S. Forest Service Road M-2); south on the Mendocino Pass Road to the intersection of Forest Highway 7; west on Forest Highway 7 to the Middle Fork of the Eel River near Eel River Work Center; southwest on the Middle Fork of the Eel River to the Black Butte River; Black Butte River to the Glenn-Mendocino county line; south along the Glenn-Mendocino and Lake-Mendocino county lines to the northern boundary of State Game Refuge 2-A; east and south along the northern and eastern boundaries of State Game Refuge 2-A to the Glenn-Lake near Sheetiron Mountain; south along the Glenn-Lake and Colusa-Lake county lines to Forest Service Road 17N16; west on Forest Service Road 17N16 to Forest Service Road M-10; west on Forest Service Road M-10 to the Rice Fork of the Eel River; northwest along the Rice Fork of the Eel River and the shore of Lake Pillsbury to the Main Eel River at Scott Dam; west and north along the Main Eel River to the Hearst-Willits Road; southwest on the Hearst-Willits Road to Commercial Avenue; west on Commercial Avenue to Highway 101; north on Highway 101 to Highway 1 at Leggett; west on Highway 1 to its intersection with the South Fork of the Eel River; north and west along the South Fork of the Eel River to the main Eel River; west and north along the main Eel River to mouth of the Eel River and north along the Pacific coastline to the point of beginning.

2. Zone B-2.

In those portions of Humboldt, Shasta, Siskiyou, Tehama, and Trinity counties within a line beginning at the intersection of Interstate 5 and Highway 299 in Redding; west on Highway 299 to the Bully Choop Mountain Road at the Shasta-Trinity county line and Buckhorn Summit; south on the Bully Choop Mountain Road to a point where this road leaves the Shasta-Trinity county line at Mud Springs; southwest along the Shasta-Trinity county line to the Browns Creek-Harrison Gulch Road; south on the Browns Creek-Harrison Gulch Road to Highway 36; east on Highway 36 (200 yards) to Forest Service Arterial Road 41; south on Forest Service Arterial Road 41 to Stuart Gap at the Tehama-Trinity county line; south on the Tehama-Trinity county line to the north boundary of the Yolla Bolly-Middle Eel Wilderness Area; west and south on the Yolla Bolly-Middle Eel Wilderness boundary to the South Fork of the Trinity River; north and west along the South Fork of the Trinity River to Highway 299; west and north on Highway 299 to Highway 96 at Willow Creek; north on Highway 96 to the Cecilville-Salmon River Road (Forest Service Road 93) at Somes Bar; east along the Cecilville-Salmon River Road to Highway 3 at Callahan; east along Highway 3 to the Gazelle-Callahan Road (Forest Service Road 1219); east along the Gazelle-Callahan Road to Highway 99; north along Highway 99 to Louie Road; east along Louie Road to Interstate 5; south along Interstate 5 to the point of beginning.

3. Zone B-3.

In those portions of Colusa, Glenn, Lake, Mendocino, and Tehama counties within a line beginning at the intersection of Interstate 5 and Black Butte Reservoir Road; south on Interstate 5 to the Glenn-Colusa county line; west along the Glenn-Colusa county line to the Elk Creek-Stonyford Road (County Road 306); south on the Elk Creek-Stonyford Road to the Letts Valley-Fouts Spring Road; west on the Letts Valley-Fouts Spring Road through Fouts Spring to Forest Service Road M-10; west on Forest Service Road M-10 to the Colusa-Lake county line; north along the Colusa-Lake and Glenn-Lake county lines to the eastern boundary of State Game Refuge 2-A, near Sheetiron Mountain; north and west along the eastern and northern boundaries of State Game Refuge 2-A to the Lake-Mendocino county line; north on the Lake-Mendocino and Glenn-Mendocino county lines to the Black Butte River; northwest along the Black Butte River to the Middle Fork of the Eel River; east and north along the Middle Fork of the Eel River to Forest Highway 7 near the Eel River Work Center; east on Forest Highway 7 to the Low Gap-Government Flat Road; north on the Low Gap-Government Flat Road to the Round Valley-Paskenta

Road at Government Flat; east on the Round Valley-Paskenta Road to the Black Butte Lake-Newville Road; south and east on the Black Butte Lake-Newville Road to Interstate 5 at the point of beginning.

4. Zone B-4.

In those portions of Mendocino and Humboldt counties within a line beginning at the mouth of Hardy Creek and the Pacific Ocean; north along the Pacific coastline to the mouth of the Eel River; east and south along the main Eel River to the South Fork of the Eel River; south along the South Fork of the Eel River to state Highway 1 at Leggett; west on state Highway 1 to Hardy Creek; west along Hardy Creek to the point of beginning.

5. Zone B-5.

In those portions of Glenn, Mendocino, Shasta, Tehama and Trinity counties within a line beginning at the intersection of Highway 299 and Interstate 5 in Redding; south along Interstate 5 to the Black Butte Lake- Newville Road near Orland; west and north on the Black Butte Lake-Newville Road to the Round Valley-Paskenta Road; west on the Round Valley-Paskenta Road to the Pacific Crest Road (U.S. Forest Service Road M-2) near Government Flat; north on the Pacific Crest Road to the Summit Trailhead at Green Springs; north along Summit Trail to Soldier Ridge Trail; south and west along Soldier Ridge Trail to Minnie Creek; north and west on Minnie Creek to Balm of Gilead Creek; west on Balm of Gilead Creek to the Middle Fork of the Eel River; west on the Middle Fork of the Eel River to the North Fork of the Middle Fork of the Eel River; north on the North Fork of the Middle Fork of the Eel River to the Four Corners Rock-Washington Rock Trail; north and west on the Four Corners Rock-Washington Rock Trail to the boundary of the Yolla Bolly-Middle Eel Wilderness Area; north along the boundary of the Yolla Bolly-Middle Eel Wilderness Area to the Tehama-Trinity county line; north on the Tehama-Trinity county line to Forest Service Arterial Road 41 at Stuart Gap; north on Forest Service Arterial Road 41 to Highway 36; west on Highway 36 (200 yards) to the Browns Creek-Harrison Gulch Road; north on the Browns Creek-Harrison Gulch Road to the Shasta-Trinity county line; northeast along the Shasta-Trinity county line to Mud Springs, where the Bully Choop Mountain Road joins the Shasta-Trinity county line; north on the Bully Choop Mountain Road to Highway 299 at Buckhorn Summit and the Shasta-Trinity county line; east on Highway 299 to Interstate 5 in Redding.

6. Zone B-6.

In that portion of Siskiyou County within a line beginning at the California-Oregon state line and its intersection with Interstate 5; south on Interstate 5 to Louie Road near Gazelle; west on Louie Road to Highway 99; south on Highway 99 to the Gazelle-Callahan Road at Gazelle; west on the Gazelle-Callahan Road to Highway 3; west on Highway 3 to the Cecilville-Salmon River Road (Forest Service Road 93) at Callahan; west on the Cecilville-Salmon River Road to Highway 96 at Somes Bar; north on Highway 96 to the Cook-Green Pass Road at Seiad Valley; north on the Cook-Green Pass Road to the California-Oregon state line; east along the California-Oregon state line to Interstate 5.

(B) Season: The seasons for the B Zone shall be those specified for the areas described as B-1, B-2, B-3, B-4, B-5 and B-6 (see subsections 360(a)(2)(B)1-6).

1. Zone B-1.

The season in Zone B-1 shall open on the third Saturday in September and extend for 37 consecutive days.

2. Zone B-2.

The season in Zone B-2 shall open on the third Saturday in September and extend for 37 consecutive days.

3. Zone B-3.

The season in Zone B-3 shall open on the third Saturday in September and extend for 37 consecutive days.

4. Zone B-4.

The season in Zone B-4 shall open on the fourth Saturday in August and extend for 37 consecutive days.

5. Zone B-5.

The season in Zone B-5 shall open on the third Saturday in September and extend for 37 consecutive days.

* Harvest with Fundraising Auction tags (Open Zone, FRO; Golden Opportunity, FRG); Archery Only tags (AO); Cooperative Deer Hunting Area Program tags (554); and Private Lands Management Program tags (PLM) are reported separate. However, for population modeling purposes, harvest with FRO, FRG, AO, 554 and PLM tags is included within the zone specific harvest and population analysis.

APPENDIX 5

2006 DEER HARVEST TABLES

Appendix table 5-1 includes the individual zone or hunt and statewide reported and estimated deer harvest by sex and percent hunter success. Appendix table 5-2 includes the individual Private Lands Management Areas (PLM) deer harvest by sex. Appendix tables 5-3 and 5-4 include the reported and estimated statewide deer harvest rolled-up by individual zone of kill for all statewide deer hunts and PLMs.
